

## NEW AMPHIPOD TAXA IN AMPHIPOD NEWSLETTER 21

Wim Vader

As usual, this index is divided into two parts, a first one with the alphabetical listing of the new taxa, and a second one with the taxonomic ordering. Both are meant to be used together with the annotated bibliography in AN 21.

**New families and subfamilies in AN 21**

This is a difficult task, as there is little agreement as to what constitutes a valid family in the order Amphipoda, and e.g. Bousfield and collaborators revive many families that have recently been merged by e.g. Barnard & Karaman. These have not been included here, as many of these family names, as e.g. Calliopiidae and Pontogeneiidae, are still in regular use anyway, and the situation in the melitoid-hadziid group is quite unclear to me.

OPISIDAE n. fam. Lowry & Stoddart, 1995c. (Lysianassoidea) *Opisa* (+3)

PODOPRIONIDAE n. fam. Lowry & Stoddart, 1996 (Lysianassoidea). *Podoprion*

**New genera and subgenera in AN 21**

ALBANO GAMMARUS Ruffo, 1995. ?Gammaridae. *A. inguscioi*

AMBICHOESTES Just, 1998. Siphonoecetinae. *Caribboecetes magellani* (+8)

AMERICHELIDIUM Bousfield & Chevrier, 1996. Oedicerotidae. *Synchelidium spinipes* (+10)

AMERICOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium spinicorne* (+9)

AMERICULODES Bousfield & Chevrier, 1996. Oedicerotidae. *Monoculodes edwardsi*

APOCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium acutum* (+3)

APODIDYMOCHELIA Thurston, 1997. Didymocheliidae. *A. castellata*

AQUADULCARIS Stewart & Griffiths, 1995. Paramelitidae. *Gammarus crassicornis* (+5)

AUSTRALESTES subgen. Just, 1998. Siphonoecetinae. (*Ambicholestes*). *A. (Au.) berentsae* (+2)

AUSTROHYALELLA subgen. Bousfield, 1996. Hyalellidae (*Hyalella*). *Hyalella neonoma*

BATHYPOMA Lowry & Berents, 1996. Siphonoecetinae. *B. enigma*

BOGIDOMMA Bradbury & Williams, 1996b. Bogidiellidae. *B. australis*.

BRACHINA Barnard & Williams, 1995. "hadziids". *B. invasa*.

CALEDOPSIS Stock & Iliffe, 1995. "melitoids". *C. levis*

CHELICOCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium curvispinum* (+11)

CHELOSCINA Shih & Hendrycks, 1996. Hyperiidea Proscinidae. *C. antennula*

CHILLAGOE Barnard & Williams, 1995. ?Paramelitidae. *C. thea*.

CHROMOPLEUSTES Bousfield & Hendrycks, 1995b. Pleustidae. *Parapleustes oculatus* (+2)

COMMENSIPLEUSTES Bousfield & Hendrycks, 1995b. Pleustidae. *Parapleustes commensalis*

COTTARELLIA Ruffo, 1994. "cheiocratids" . *C. minima*

CRASSICOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium crassirostre* (+2)

DEFLEXICODES Bousfield & Chevrier, 1996. Oedicerotidae. *Monoculodes tenuirostratus* (+14)

DESDIMELITA Jarrett & Bousfield, 1996. "melitoids". *Melita desdichada* (+5)

EOCHILIDIUM Bousfield & Chevrier, 1996. Oedicerotidae. *Synchelidium lenorostratum* (+7)

EOCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium kitamari*

GAMMAROPSELLA Myers, 1995b. Isacidae. *G. simplex* (+1)

GIPPSIA Lowry & Stoddart, 1995a. Lysianassoidea Uristidae. *G. jonesae*

GNATHOPLEUSTES Bousfield & Hendrycks, 1995b. Pleustidae. *Iphimedia pugettensis*

HARTMANODES Bousfield & Chevrier, 1996. Oedicerotidae. *Monoculodes hartmannae* (+2)

HIRAYAMAIA Bousfield & Hoover, 1997. Corophiidae. *Corophium mortoni* (+2)

HUMILOMOERA subgen. Staude, 1995. Eusiridae s.l.(*Paramoera*). *P.(H.) leucophthalma*

INCISOCALLIOPE Barnard, 1959 rev. (Bousfield & Hendrycks 1995b). Pleustidae. *I. newportensis*

JASPTORUS Bradbury & Williams, 1997b. Neoniphargidae. *J. solepti*

KROYERA Bate, 1857 rev. (Bousfield & Chevrier 1996). Oedicerotidae. *Monoculodes*

*carinatus*

LATICOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium baconi*

LIMNOCULODES Bousfield & Chevrier, 1996. Oedicerotidae. *Monoculodes limnophilus*  
(+1)

LOBATOCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium lobatum*

LUCKIA Bellan-Santini & Thurston, 1996. Eusiridae. *L. striki*.

MAERACOOTA Myers, 1997. "melitoids". *M. tridentata*

MATHAMELITA Stewart & Griffiths, 1995. Paramelitidae. *M. aequidentata*

MEDICOCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium aculeatum*  
(+5)

MEGAMOERA Bate, 1862 rev. (Jarrett & Bousfield, 1996). "melitoids". *Gammarus*  
*dentatus* (+8)

MESOHYALELLA subgen. Bousfield, 1996. Hyalellidae (*Hyalella*). *Hyalella curvispina*.

MICROCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium sextonae*  
*miospinulosum*

MICROPLEUSTES Bousfield & Hendrycks, 1995b. Pleustidae. *Parapleustes nautilus* (+4)

MONOCOROPHIUM Bousfield & Hoover, 1997. Corophiidae. *Corophium insidiosum*  
(+8)

MOONAMOERA subgen. Staude, 1995. Eusiridae s.l.(*Paramoera*). *Paramoera rua*

NAGADA Lowry & Stoddart, 1995c. Lysianassoidea Uristidae. *N. uwedoi* (+2)

NEDSIA Barnard & Williams, 1995. "hadziids". *N. douglasi*.

NEOISCHYROCERUS Conlan, 1995. Ischyroceridae. *Microjassa claustra* (+2)

NEOCRYPTA Bradbury & Williams, 1997b. Neoniphargidae. *N. primaris* (+6)

NEPANAMIXIS Thomas, 1997. Anamixidae. *N. dianthus* (+3)

NORCAPENSIS Bradbury & Williams, 1997b. "hadziids". *N.mandibulis*.

NOTOPOMA Lowry & Berents, 1996. Siphonoecetinae. *N. stoddartae* (+9)

ORENOQUIA Bellan-Santini, 1997. Lysianassoidea. *O. serrata*.

## B. Systematic index to new amphipod genera and species in AN 21

This list covers all taxa indexed in AN 21, and follows similar indices for AN 11-19 (AN 19, pp 37-51, and AN 20).

For the sake of easy reference, the index follows mostly the taxonomy of Barnard & Barnard (1983) and Barnard & Karaman (1991), but a few later revisions have been followed. Thus the Eusiridae, Iphimediidae and Lysianassoidea are all treated here as "sensu lato", as in the Handbook, but I have now split up the Corophioidea into separate families, giving an own entry to the Siphonoecetinae (cf Lowry & Berents 1996, Just 1998). For the gammaroid complex, I have used the following, admittedly quite arbitrary headings, based on Barnard & Barnard (1983) and later work by i.a. Bradbury, Holsinger and Williams: Anisogammaridae, Artesiidae, Bogidiellidae, "greater Ceradocus group" (IXa in Bnd & Bnd), "cheirocratids" (VIII), crangonyctoids (but I have now treated the neoniphargidae and Paramelitidae separately), "gammarids" (III minus Pontoporeiidae), Gammaroporeiidae, "hadziids" (IXd), "melitids" (IXe 1,2), Mesogammaridae, Neoniphargidae, "niphargids" (IXe 3-4), Paramelitidae, Pontoporeiidae, Salentinellidae, and Sternophysingidae (Not all entries occur in this index).

The other suborders have much fewer new taxa, so they have been treated as a whole for practical reasons, although the Cyamidae are kept apart.

In AN 19, p.37 I have listed the obvious shortcomings of an index like this, the most important

being, that transfers, synonymizations, and monographic revisions are not listed separately (They are often mentioned in the annotated bibliography in AN), and that the list is uncritical. Still, I think this index may be useful to colleagues, and is my way to reciprocate for all the reprints I receive from you.

**Technical details:** New genera are written in capitals. (rev.) stands for genera or species that are revived from synonymy. (subgen) and (ssp) stands for taxa that are described with the rank of subgenus and subspecies, respectively; new species are mentioned under the subgenus in which they were described.

A question mark before the genus name signifies that the family is somewhat uncertain, a question mark before the species name, that the genus is somewhat uncertain.
